

Vardaam One Year Summary

Projects and Challenges:

1. **Latis:**
 - **Office Details:**
 - Improved understanding of React concepts and state management.
 - **Campaigns Section:**
 - Used an external React library to implement drag-and-drop features.
 2. **Celeriter:**
 - Gained knowledge about the combination of Inertia.js and React.
 3. **ContractIt:**
 - **TreeView Component:**
 - Made extensive use of React features and rendering behavior.
 - Solved the task of generating a dynamic tree view for a large number of product instances.
 - Optimized the tree view by dynamically loading product data upon user interaction, making it more compatible and efficient.
 4. **Celeriter Dashboard:**
 - Implemented drag-and-drop functionality for widgets on the Dashboard UI.
-

Updates to Latis:

1. Implemented new UI/UX changes across all phases, particularly in Office Details.
 2. Updated the React Flow diagram in the Tracks section, integrating various logics to meet requirements and exploring the possibilities of the react-flow library.
 3. Updated and refactored UI/UX changes across all phases, including:
 - Marketing
 - Production
 - Sales
 4. Created a common wrapper component to showcase chat messages, email messages, and photo galleries across all phases.
 5. Developed a custom template builder for contracts using Craft.js and created a custom CSS manager to apply dynamic CSS according to document needs.
-

1. **Celeriter:**
 - Added a resume parser using the pdfjs-dist library.
 - Updated and modified the Attendance Timeline Graph.
